

## SETTING UP YOUR LAMP IN 4 EASY STEPS

Find a **flat, stable surface** for your LAVA<sup>®</sup> Lamp, **away from heat and sunlight**.  
Ensure all parts are at **room temperature** before beginning.

Tightly screw bulb into socket in base.

Place globe in base and put cap on top.

Plug the cord into a power outlet.

Click switch on cord to power on or off.

## 3 RULES EVERY LAVA OWNER MUST FOLLOW

Raise your right hand and repeat after me: I promise to...

1. **Be Gentle** - Your globe doesn't take well to being shaken.
2. **Take Breaks** - Don't run lamp for longer than 10 hours at a time.
3. **Be Cool** - Allow your LAVA® Lamp to cool for 2-3 hours after use.

**NOTE:** Your lamp will not begin to flow immediately.  
**Allow it to warm up for 2-3 hours.**
